

## Excel & VBA/Macro Projects using AI

AI has evolved to become a power tool, a tool to enhance productivity. In this course we would be using AI to do what was earlier thought to be impossible.

You will learn in step by step, easy to understand, from roots using scientific methods.

Rather than going concept by concept we would learn project by project thereby imparting solid practical working knowledge.

### Project 1

Finance Payment Reconciliation project involving complex lookups and Macros

## Project 2

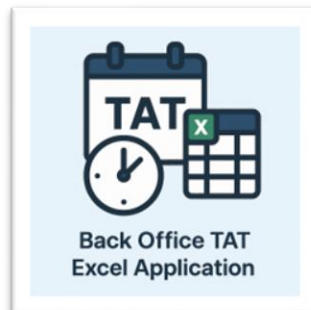

HR Data Cleaning & transformation project involving merging of various sheets and workbooks.

## Project 3

Sales Analysis project using Tables, Pivot Tables, Charts, Slicers & Dashboard.

## Project 4

Back Office TAT Excel Application project involving various Date related function, logical etc calculations

## Project 5
